Products**

## **Product Information Aluminum & Stainless Steel Fabstraps**

### **Products Description**

Ideal Products' Fabstraps are pre-fabricated in our facility using an automated process, eliminating the need for on-site fabrication. Ideals' Fabstraps are cut to the right length every time, to help save time and money in the field when securing cladding and insulation in place. They are supplied in ½" and ¾" widths in both Aluminum and Stainless Steel.

Alloy:           Aluminum and Stainless Steel T304

Thickness:     Aluminum - .020"  
                  Stainless Steel T304 - .015", .020"
