Product Information Box Rib Sheets (4 x 1) Alclad & Nonclad

Product Description

Ideal Products 4" Box Rib is manufactured from a rolled process which forms a continuous pattern of 1" high ribs on 4" centers, engineered for maximum structural stiffness. The 4" Box Rib is an industry standard used in industrial applications.

Alclad aluminum is a composite, of 7072 aluminum alloy, formed by a metallurgical bonding process. The 7072 aluminum is applied to both sides of an alloy T3004 core. This process is designed for superior corrosion resistance.

Alloys: T3004/7072 Alclad and 3105 Non-Clad
Stainless Steel and Galvalume are available upon request

Finishes: Stucco Embossed, Smooth

Thicknesses: Aluminum - .032", .040", .050"
Stainless Steel/Galvalume - .024" (38½" widths only)

Widths: 38½" (36" coverage)
45⅝" (44" coverage)

Lengths: 3' to 30'

Colors: Painted material available upon request (minimums apply)

Kynar® Painted Aluminum. Closure Strips available as well.
