Product Information Gardner Bully Combination Beader and Crimper

The GARDNER BULLY Combination Beader and Crimper is a machine that is light in weight and can perform *both beading and crimping sequentially in one setup*. This hand cranked unit is easily portable and is intended for field use in the insulation trade where thin guage materials are used.

FEATURES

- Performs both beading and crimping operations sequentially with one setup.
- No tools are needed for setups.
- All adjustment knobs are captive. There are no seperable items that may become lost.
- Both bead and crimp have markable surfaces to assist the operator in repeating set ups.
- Easy to read scales and marked surfaces for the bead edge guides
- Either 1/8 inch or 1/4 inch bead sizes available. Unit capable of accepting either bead size with easy field conversion. Additional bead heads sold seperately.
- The unit allows the head to be positioned as desired to the preference of the operator.
- Easily portable for job site use.
- Designed to last.
