Product Information

Aluminum Roll Jacketing Acrylic Paint with Polysurlyn Moisture Retarder

Product Description

Ideal Products' Acrylic Painted Aluminum with Polysurlyn Roll Jacketing is manufactured from 3000 series aluminum, meeting ASTM B-209 standards. This aluminum jacketing has an exterior layer of heat cured acrylic enamel (clear or color tinted), with the addition of a 3mil layer of Polysurlyn over the interior. The exterior acrylic painted finish provides an effective resistance to oxidation and corrosion in various environments. The combination of heat cured acrylic enamel (whether clear or color tinted) and laminated Polysurlyn provide the best moisture and corrosion protection available on Aluminum Roll Jacketing today. With this type of protection, you can be assured your project will be protected in those areas where moisture and corrosion resistance is a must.

Acrylic Paint with Polysurlyn Moisture Retarder Aluminum Jacketing is available in both smooth or stucco embossed finishes, and in 0.016", 0.020", 0.024" and 0.032" gauges. Various color tinted paint is available. Ideal Products stocks Exxon Gray, White, Mocha Tan, Juniper Green, Covert Green, Carlsbad Canyon and Clear.

Product Application

- | | |
|----------------|--|
| 0.016" (0.4mm) | Recommended on pipelines up to 24" O.D., including insulation. Used to protect piping, vessels, and tanks which are less than 8 feet in diameter. |
| 0.020" (0.5mm) | Recommended on pipelines up to 36" O.D., including insulation. Used to protect towers, vessels, and tanks with a diameter greater than 8 feet. |
| 0.024" (0.6mm) | This heavier gauge is used where extra strength and protection is required. Used to protect larger diameter pipelines, towers, vessels, tanks and equipment. |
| 0.032" (0.8mm) | For areas where extra heavy protection is required, or in custom fabrication of box covers, tank heads, or heavy wear areas. |

This product is excellent for the use in corrugated sheets where the extra moisture and corrosion protection is required.
