

GARDINER BULLY COMBO BEADER/ CRIMPER

PRODUCT DESCRIPTION

The Gardner Bully combination beader/crimper is a tool to be used on the go. This hand cranked unit only weighs 16 lbs. and is highly portable. It is 100% American made and built to last.

PRODUCT FEATURES

Both the bead and crimp can be done in one set-up. You can choose between 1/4" or 1/8" bead and the maximum distance from bead center to the material edge is 1 1/2". Maximum crimp width is 1 1/2" as well. Adjustable stops allow the user to set the bead distance and crimp width up to the maximum allowed.

The Gardner Bully Combo is equipped with a benchtop mounting clamp that can accommodate thicknesses of 3/4" to 3 1/2" and is perfect for mounting to a pickup truck gate or a van bumper.

This Gardner Bully beader/crimper can accommodate material thicknesses up to 0.030".

PRODUCT APPLICATION

The Gardner Bully can be used in the field or used in the fabrication shop to manufacture several jacketing items in both aluminum and stainless steel. Precision fit gores, end caps, beveled reducers, tees and tank head peels are just a few of the practical applications for the Gardner Bully beader/crimper.

When utilized in a shop, the Gardner Bully can be retrofitted with a motor, variable speed controller and foot pedal to speed up productivity without giving up safety. It is a favorite choice of field insulators due to its sturdy construction and portability.
